Overview

The Security Bureau have a customised access to a predefined proportion of our database which enables them to reach out to all contacts within their specific target area.

Using i4b data The Security Bureau were targeting IT contacts at companies across most verticals. They sent educational and plain text emails to potential prospects outlining the challenges companies face regarding cyber security.

During these campaigns The Security Bureau achieved a click through rate of around 32% with an email accuracy of 98%. Through these campaigns The Security Bureau have created 10 high quality opportunities with a total pipeline revenue of over £70k using the i-4business database in just a few of months.

“We've been delighted by the high-quality data provided by i4b which has enabled us to target IT professionals across a number of sectors which has resulted in over £70k of qualified sales opportunities.”

Alastair Digby
Business Development Manager
